# Serikbayeva Gaukhar Bakbergenovna

Founder of the Vertex Max company

Financial economist with long-term experience in financial realm  
as an accountant and economist

Gaukhar Bakbergenovna started working in the network sector in search of health products. The ailment was cured thanks to the products sold via multi-level marketing. As a financier she was able to comprehend that this sector also allows solving the problems of financial nature. Having succeeded in more than 15 large-scale companies like Mary Kay and Oriflame, she came up with a dream that gave impetus to search for a company in which people can enhance their health and financial aspect of life. It was the multi-level marketing that made it possible to turn such an aim into reality. Meeting with the Manufacturer, who wanted to bring the products to the general public, became a factor essential for creation of affordable marketing that combines the advantages of promoting a natural and high-quality domestic product onto the domestic market with moving outside the borders of the country! The dream also became reality thanks to the partners who believed in her project, and our company's partner network began to expand! The product met all expectations. Currently, she has 6 certificates, and 4 of them are of international standard. In a short period of time, partners began to share their results of using the first phyto-sprays of Kazakhstani production! This is how the VertexMax company was created and allowed moving to the great and outstanding results in any direction!

The founder of the company spent years in search of the opportunity to create a business that would amalgamate two most important goals in life, i.e. being healthy and financially free. In 2020 she has managed to find what she had been looking for and created a company that provides the following to anyone who wants it:

- Opportunity to maintain health using natural products;
- Opportunity to have a large income;
- High quality products and a simple and fair marketing plan;
- Opportunity to help other people become healthier and richer.

Latest development using a unique formula:

High quality standards;  
International certificates;

Innovative technologies;  
100% natural ingredients.

ST – Standard

Safety Compliance

This is not a medication

“We believe that the world of plants conceals immense opportunities for disease prevention and treatment, and no one has been able to synthesize a medicine better than the nature does.”

This is not a food supplement

# Vitaslim Spray

Weight Loss Spray

## Ingredients:

Hellebores root, tinder fungus, medicinal lungwort, fennel seeds, peppermint, ginger root, buckthorn bark, strawberry, honey (max. 6%).

## Pharmacological effect:

The main advantage of the product is its effect on the liver, forcing it to secrete enzymes that split body fats and restore disturbed metabolism. This weight loss spray is a special product containing only natural ingredients. It is a perfect remedy for those striving to get rid of excess weight. The product is available in the form of a spray bottle, and may be used with or without food. However, it is best to use the product shortly before a meal. This will greatly reduce your appetite, thus enabling you to eat less. It is due to decreased food intake in the body that the weight loss will be achieved. The spray is simply irreplaceable for those following a diet. Vitaslim Spray will make it easier to tolerate the new food intake regime. In addition, there is no need to adjust the diet. The weight loss spray will suppress appetite.

**Uses:** 2-3 sprays 4-5 times a day

**Shelf life:** 12 months

# Para Spray

Anti-Parasitic Spray

## Ingredients:

Chanterelle mushroom, clove spice, green walnut, tansy, walnut leaves, barberry, honey, alcohol (max. 6%).

## Pharmacological effect:

It has a deleterious effect on various types of parasites. The substance has a blocking effect on the nerve centers of helminths. It activates the anti-parasitic human body defence mechanism. It is a strong antioxidant suppressing free radicals and preventing premature aging of the human body. Antiseptic (bactericidal) action. It improves digestion, reduces flatulence, and boosts the immune system. It has strong antiseptic properties used in dentistry: it helps to fight against inflammation of the mucous membranes of the tongue and gums, as well as periodontal disease, and it is also a great aphrodisiac enhancing sexual arousal. It is a good anthelmintic (against roundworms and pinworms). It stimulates the secretory and motor processes of the gastrointestinal tract, as well as raises the tone of the gallbladder wall, stimulates the appetite, and improves digestion. It improves liver function, regeneration processes (in case of hepatitis and liver cirrhosis). It has antispasmodic and analgesic properties, as well as antibacterial activity.

**Uses:** 2-3 sprays 4-5 times a day

**Shelf life:** 12 months

# Heart Spray

Cardio-Hypertonic Spray

## Ingredients:

Rhododendron adamsii, hawthorn flowers and berry, ziziphora, white mistletoe, mint, orthilia secunda berry, honey, alcohol (max. 6%).

## Pharmacological effect:

It has strong tonic properties, it is effective as an immunomodulatory, prophylactic remedy that enhances the body's resistance to infections. It helps to maintain immunity. It enhances cardiac activity, lowers pressure, improves the organism resistance to oxygen starvation. It has a cardiogenic, antispasmodic and moderate sedative effect, has hypotensive properties and normalizes blood clotting ability. It soothes the central nervous system, enhances the contraction of the heart muscle, regulates the heartbeat, normalizes the blood cholesterol level, and enhances the blood circulation in the coronary heart vessels and cerebral vessels. As a cardiogenic and blood circulation regulator, it is recommended for circulatory failure in the elderly, especially those having climacteric diseases, atherosclerosis, and cardiac neuroses. It is effective for atherosclerosis, demonstrated through blood cholesterol level reduction and improvement of the functional capacity of the heart muscle.

**Uses:** 2-3 sprays 4-5 times a day

**Shelf life:** 12 months

# Men's Spray

Men's Spray

## Ingredients:

Hedysarum, rhodeola rosea, bay willow, ginseng root, tribulus terrestris, aspen bark, juniper berry, honey, alcohol (max. 6%).

## Pharmacological effect:

An adaptogenic agent increasing mental and physical performance and reducing fatigue during exercise. Natural adaptogens form adaptation to adverse factors, and body's resistance. Direct effect is on the prostate gland with relaxation of the smooth muscles of the ducts of the prostate glands. Hedysarum neglectum is good for men suffering from prostatitis, and can also be useful for treatment of various tumors and various types of leukemia. In case of chronic prostatitis, it reduces pain and dysuric disorders, sexual dysfunctions, and bacteriuria. In case of benign prostatic hyperplasia of I, II degrees, dysuric and sexual disorders are less common. It is efficient for treatment of impotence, it increases libido, normalizes hormonal levels, stimulates the gonads, and activates spermatogenesis. Such properties are due to the ability of tribulus terrestris to stimulate the function of the pituitary and hypothalamus, increasing the production of luteotropin. This peptide hormone stimulates production of testosterone in men.

**Uses:** 2-3 sprays 4-5 times a day

**Shelf life:** 12 months

# Women's Spray

Women's Spray

## Ingredients:

Orthilia secunda, rhodiola algida, alchemilla, peony root, chaga mushroom, sage, oregano, strawberry, honey, alcohol (max. 6%).

## Pharmacological effect:

The spray has anti-inflammatory, antimicrobial, antineoplastic, absorbable, analgesic and diuretic effects. It helps to maintain immunity. It increases the functional activity of the uterus and appendages, improves the reproductive system functioning. Arbutin provides anti-inflammatory, diuretic effects; hydroquinone has antioxidant properties; coumarin is an anticoagulant. Flavonoid has anti-inflammatory, choleric, diuretic, sedative, antioxidant properties; saponin has expectorant, diuretic, tonic, sedative properties. It is good for treatment of gynecological inflammatory diseases, uterine bleeding, menstrual irregularities, cervical erosion, endometriosis. It eliminates hormonal imbalances. It reduces and eliminates spasms of the smooth muscles of internal organs and blood vessels. It diminishes the signs of menopause and relieves menopausal hot flashes. It normalizes the activity of the sex glands.

**Uses:** 2-3 sprays 4-5 times a day

**Shelf life:** 12 months

# Lungs Spray

Bronchopulmonary Spray

## Ingredients:

Parmelia, white horehound, marshmallow root, liquorice root, fennel seeds, coltsfoot, rosehip fruit, honey, alcohol (max. 6%).

## Pharmacological effect:

Anti-inflammatory, antiviral agent having antipyretic properties. It promotes gentle excretion of phlegm. The spray provides anti-inflammatory, emollient and expectorant effects; it is also able to protect the mucous membrane of the respiratory tract from the effects of various chemical factors and bacteria. It suppresses the growth of tuberculosis microbacteria, gram-positive microorganisms (staphylococci, streptococci). It has a coating effect on the mucous membranes of the mouth, throat and larynx. It softens, dilutes the dry discharge in the upper respiratory tract, normalizes the movement of the ciliated epithelium in the trachea and bronchi. It discharges the products of inflammation through expectoration. It has antispasmodic, relaxing, astringent, antiarrhythmic, hypotensive effect. It softens the tracheal plaque, protects the nerve endings of the mucous membranes of the pharynx and trachea from irritating factors and heals the affected areas of the mucous membrane, and facilitates expectoration. It enhances the secretory activity of the mucous membranes of the upper respiratory tract.

**Uses:** 2-3 sprays 4-5 times a day

**Shelf life:** 12 months

# Vessel Spray

Vessel Spray

## Ingredients:

Red clover flowers, red mountain-ash bark, hawthorn flowers, pine cones, sophora japonica, dioscorea caucasica, viscum album, aesculus, honey, alcohol (max. 6%)

## Pharmacological effect:

The spray for vessels is used to improve cardiovascular activity. It thins the blood and strengthens the capillary walls. It reduces the permeability of capillaries, stimulates the antithrombotic activity of blood serum, increases the production of antithrombin in the reticuloendothelial vascular system, and increases the venous blood filling, especially if there are any pathological changes. It reduces blood viscosity, increases the tone of venous vessels. It has a strong antiatherosclerotic effect, and enhances the function of cardiac glycosides. In addition, it lowers blood pressure, reduces the excitability of the nervous system, enhances cardiac activity, and efficiently strengthens the walls of blood vessels, dilates blood vessels, reduces the excitability of the central nervous system, increases diuresis, intensifies the excretion of nitrogenous products.

**Uses:** 2-3 sprays 4-5 times a day

**Shelf life:** 12 months

# Healthy Child

Syrup for Children

## Ingredients:

Rosehip fruit, barberry, hawthorn, cranberry, marshmallow root, liquorice root, coltsfoot, peppermint.

## Pharmacological properties:

Pharmacological properties of the biologically active substances in the plant provide a beneficial complex effect of coltsfoot herbal preparations on the inflammatory processes in the mucous membranes of the respiratory tract and oropharynx. Coltsfoot is widely used in traditional medicine. It is used for respiratory tract diseases, cough, bronchitis, aphonia, as well as inflammatory diseases of the gastric and intestinal mucosa, diarrhea, kidney disease, bladder, dropsy.

## Sanative properties:

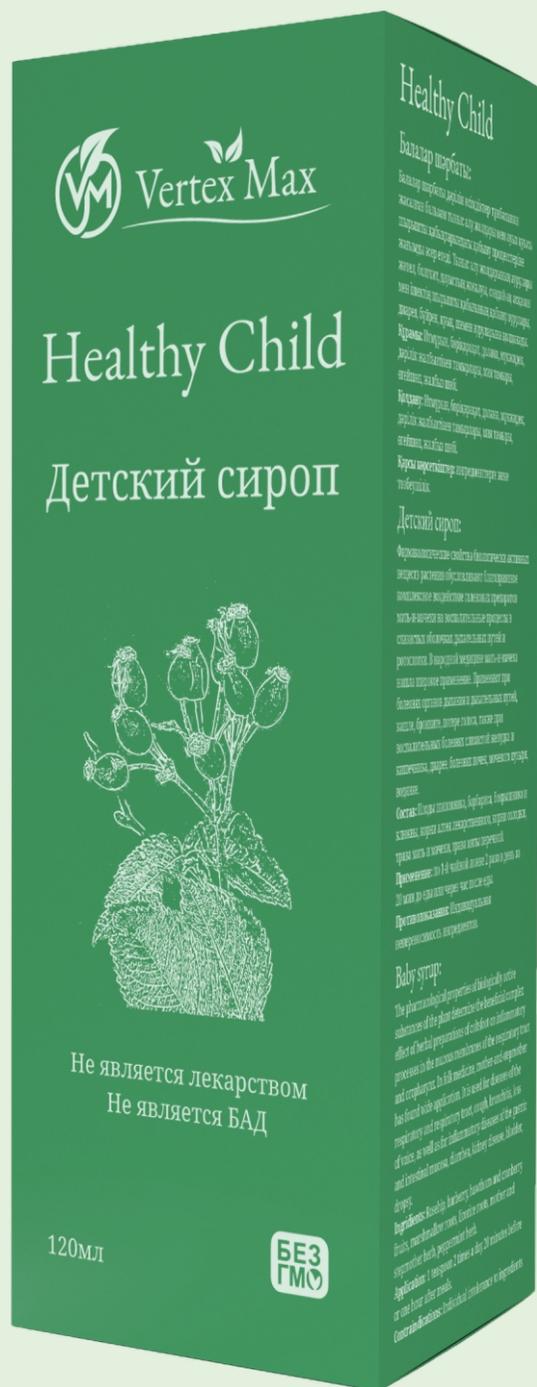

It enhances immunity, normalizes the function of the kidneys, liver, spleen and stomach. It provides an expectorant and antiviral effect.

## Treatment and prevention:

Influenza, cold, bronchitis, pneumonia, weakened immunity, kidney disease. The formulation for children is indicated for use not only for treatment, but also for prevention of most viral diseases.

**Uses:** 1 teaspoon twice a day 20 minutes before meals or one hour after meals.

**Shelf life:** 12 months

# Spine Salve

Spine Salve

## Ingredients:

Common comfrey, oils, bee wax.

## Pharmacological effect:

An effective topical preparation for muscle and joint pain and inflammation. The effect made by the product leads to acceleration of the healing processes in wounds and ulcerative lesions; it stimulates the epithelium regeneration processes and bone tissue growth, and reduces pain. Comfrey, also called larkspur, which is a component of the salve, is a medicinal plant for treating joints and healing fractures. The product has an anti-inflammatory and hemostatic effect. The salve is very often used for everyday bruises and sports injuries.

**It is used for:** Intervertebral hernias, Protrusion of intervertebral discs, Radiculitis and osteochondrosis, Bone fractures, Bruises and sprains, Rheumatic and gouty pains.

**Method of application:** The comfrey salve is intended for topical use. Apply a thin layer of the salve onto the surface of the painful area and rub it thoroughly into the skin; this should be done 2-3 times a day. The salve may also be applied and covered with the dressing for the night. Treatment duration depends on the type of concomitant therapy as well as on the severity of the disease itself.

**Shelf life:** 12 months
